MOVE TO ZERO

MOVE TO ZERO IS NIKE'S JOURNEY TOWARD ZERO CARBON AND ZERO WASTE, HELPING TO PROTECT THE FUTURE OF SPORT.

OUR PATH TO ZERO

We all share the responsibility for our playground—Planet Earth. That's why we're reimagining things top to bottom through sustainability and circularity. We're focusing on carbon, waste, water, and chemistry, aiming to hit targets by 2025. Check out our Impact Report to see our progress.

Explore

2025 TARGETS

0.5M

100%

25%

0.5M tons less of greenhouse gas emissions, through increasing our use of environmentally preferred materials to 50% of all key materials: polyester, cotton, leather and rubber.

100% waste diverted from landfill in our extended supply chain with at least 80% of waste recycled back into Nike products and other goods.

25% reduction of fresh water usage per kilogram in textile dyeing and finishing.

BLOOM OVER DOOM

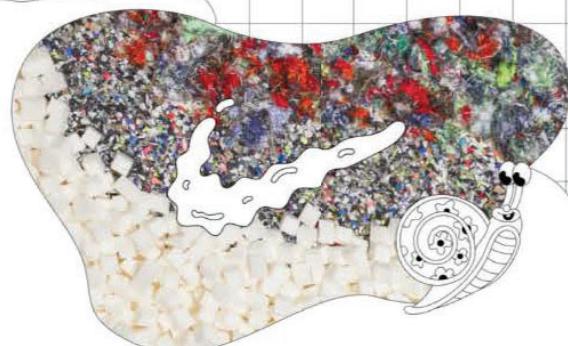

Nike has pushed the boundaries of sustainable innovation for decades. But what got us here won't get us where we need to go. We're evolving the playbook, transforming science fiction to science fact, at Nike's scale. We're not there yet, but we know where we're going—moving to zero and then beyond. We think of it as "Bloom Over Doom"—tenacious optimism, audacious innovation and collective action so we all, and this beautiful blue ball, thrive.

MATERIALS WITH LESS IMPACT

By reusing existing plastics, yarns and textiles, and inventing entirely new materials, we're making big strides forward on our journey to zero carbon and zero waste.

Recycling + Donation

Help reduce waste by donating or recycling worn athletic shoes and apparel.

[Learn More](#)

Refurbished

We source a mix of eligible returns and open box footwear to create an opportunity to purchase gently used shoes at a lower price.

Re-Creation

We collect local vintage and dead stock product, using its materials to create newly designed and manufactured pieces.

TAKING ACTION, TOGETHER

Did you know? The "Sunburst" symbol was created in the 1970s as a circular option where asymmetry of the Swoosh logo didn't work. Since then, in the same nature of our circular design philosophy, we've repurposed the logo. Today, when you see this logo, you see one small step in our journey to Move to Zero.

Get the latest Nike Sustainability news and discover new ways we can help protect the future of sport together.

Our Latest Stories

Nike Forward: A Little Care Goes a Long Way

Nike Forward is a special material that appreciates special care. Wash Nike Forward garments on cold before laying them flat to dry. Take care of any piling with an electric fabric shaver.

Move to Zero

Meet Nike Forward

The inaugural collection is made with an average of 75% less carbon compared to our traditional knit fleece. We call it Forward because that's where we're going.
